

# SEIT Technical Details

AF Rep: Elise Erikson	<b>Mission Planning SEIC</b>
Navy Rep: Dave Pearson	<b>Industry Day</b>
Army Rep: Hunter Matthews	16 Dec 02
SOF Rep: Nyle Wilcocks	

# Overview

Mission Planning SE

- Purpose and Overview
- Product Development Context
- Roles/Responsibilities
  - Government Program Management
  - Common Software, Framework, legacy system and UPC Developers
  - System Engineering Integration Team
    - Systems Engineering Integration Contractor (SEIC)
    - Systems Engineering Integration Government members
- Interactions
- Example Roles/Responsibilities interactions
- Challenges for industry

# Systems Engineering Integration Team

---

Mission Planning SEIT

- Purpose

- The Mission Planning vision is to evolve Mission Planning into a set of mission planning tools and components for all of DoD.
- The purpose of the SEIT is to ensure that these tools and components are architecturally sound, robust, controlled, easy to use, integrate well with the system, adhere to government standards, and adhere to JMPS business and technical rules.

# JMPS Organization

Mission Planning SEI

## Joint Enterprise Management Team (JEMT)

**JMPS IPT Lead**  
CDR Bellini

**Army JMPS PM/Systems Engineer** **Air Force JMPS PM/Systems Engineer** **Navy JMPS PM/Systems Engineer** **SOCOM PM/Systems Engineer** **SEIC/Systems Engineer TBD**

## Systems Engineering and Integration Team (SEIT)

**UPC, CC and Legacy developers**

**Army Reps**

**Air Force Reps**

**Navy Reps**

**SOCOM Reps**

**SEIC Reps**  
TBD

**JMPS SEIT Will Be a Distributed Gov't and Industry Team**

# SEIT Sphere of Influence

Mission Planning SEI

- Key Products/ Provided by other contractors
  - JMPS Framework Software
  - JMPS Common Software
  - JMPS UPC Software
  - Legacy systems
- Goals
  - Foster the migration of legacy systems
  - JMPS integration to the battle space
- Influence varies for each software type and by level of support required by each of the Services.
- Influence begins at early conceptualization phase for
  - New software to be integrated into JMPS
  - Updates to existing JMPS related products

**SEIC plays a role within the sphere**

# SEIT Tasks

Mission Planning SEI

- Integration
- Requirements Analysis
- Architecture and Design Guidance
- System Evolution Management
- Understanding UPC Customer Needs
- CM/DM/QA Illities
- Cost, Schedule, Performance and Quality
- Risk Management
- Process Definition and Management
- User Support
- Engineering Management
- Government Program Management Support
- Developer Support
- Maintain Close Coordination with Warfighters

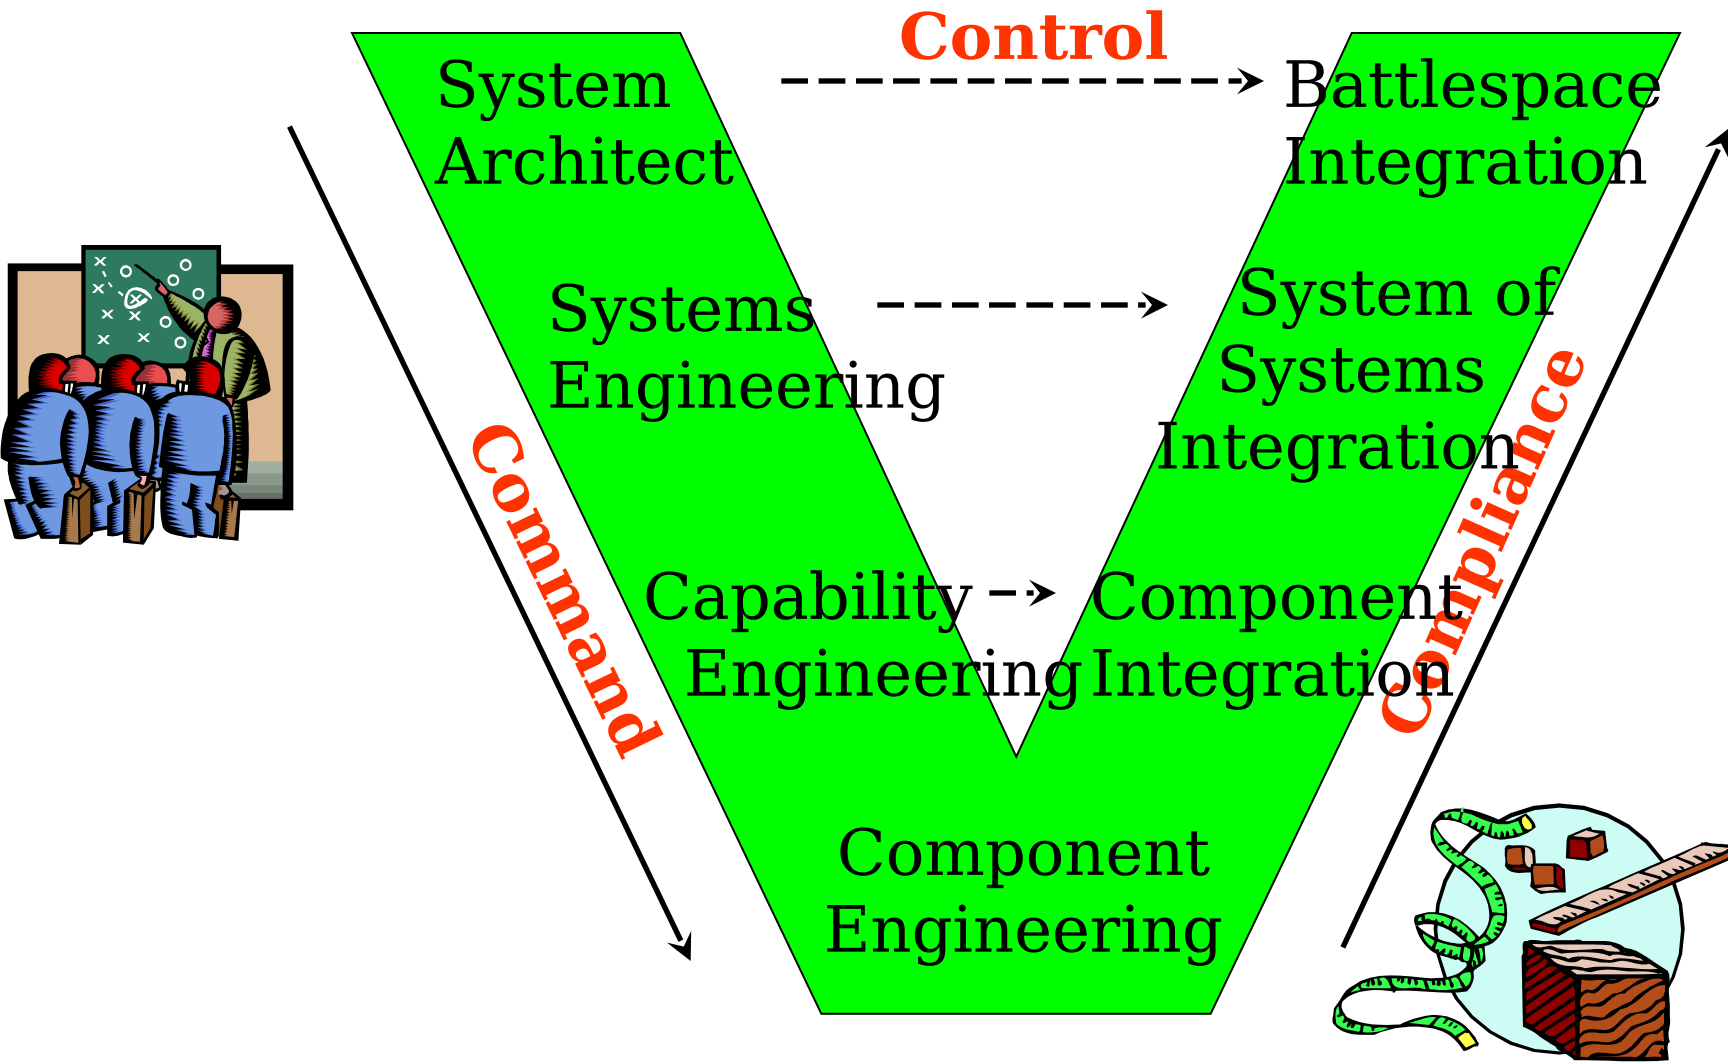

# JMPS Product Development

Context

Mission Planning SE

## Integration of Mission Planning Systems into the Battle space

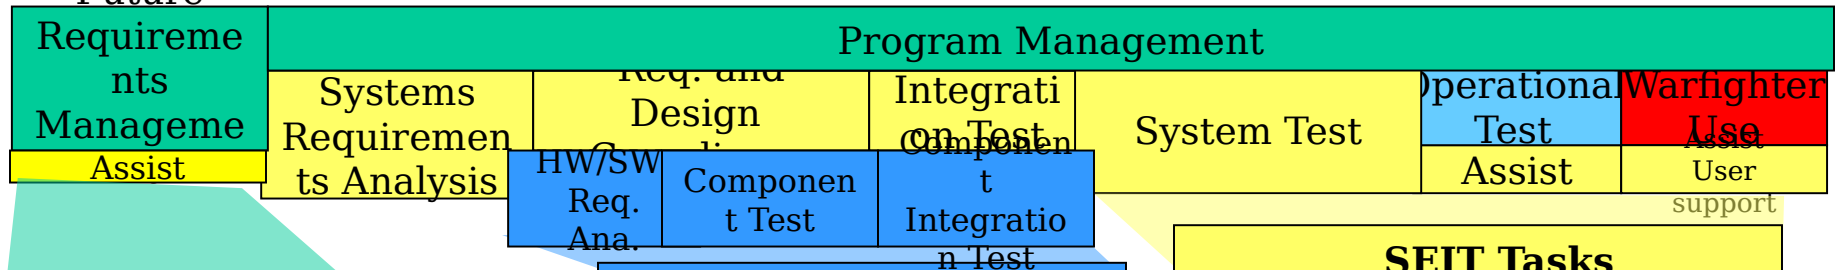

# Typical Product Responsibilities

Mission Planning SE

Developer defined as framework maintainer, common software

Future

## Government Program Mgmt

- Future Requirements Management
- Program Planning
- Controlling the Technical Effort
- Product Line Evolution Management
- Contract Management
- Program Funding
- Risk Management
- System Architectural Considerations
- Organizational development

## Typical Products

Risk Management Process  
Requirements Process

## Developer

- HW/SW Requirements Analysis
- HW/SW Design
- Design Component
- Design Capability
- Component Test
- Capability Testing
- Risk Management
- Technical Rules, Standards
- Metrics
- Training inputs

## Typical Products

Software Requirements Specification  
Interface Design Documentation  
Programmers Guide  
Component test procedures  
COE compliance Level 6  
Security compliance & Metrics

## SEIT Tasks

- Integration
- Requirements Analysis
- Architecture and Design Guidance
- System Evolution Management
- Understanding UPC Customer Needs
- CM DM QA Utilities
- Cost, Schedule, Performance, Quality
- Risk Management
- Process Definition and Management
- User Support
- Engineering Management
- Government Program Man. Support
- Developer Support
- Maintain close coordination with Warfighters

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metric reports, Data

Mission Planning SEI

## Program Management

Requirements  
Management  
Assist

**Key** (SC) SEIT Contractor

(G) Government

(CC) Common Software/framework maintainer  
developers

- **Future Requirements Management**

1. Development/adherence to Requirements Process (G)
2. Identify and manage future requirements in accordance with the requirements process. (B)

- **Program Planning / Scheduling**

1. Provide direction to be given to contractors of the level of detail and incorporation of changes for schedule, i.e contractors deliverables (G)
2. Establish operational need dates (G)
3. Approve schedule (G)
4. Provide external system schedules (G)

- **Controlling the Technical Effort**

1. Approve system level use cases, interfaces, object model, build content and changes (G)
2. Systems engineering team provides advice to the government regarding direction to be given to contractors concerning use case, interface, object model level of detail and incorporation of changes to all contractors (G)

## Government Program Mgmt

- **Future Requirements Management**
- **Program Planning**
- **Controlling the Technical Effort**
- Product Line Evolution Management
- Contract Management
- Program Funding
- Risk Management
- System Architectural Considerations
- Government schedule inputs
- Organizational development

## Typical Products

Requirements Process

# Government Program Management

Mission Planning System

## Program Management

Requirements Management  
Assist

**Key** (SC) SEIT Contractor

(G) Government

(CC) Common Software/framework maintainers  
developers

(B) SC and/or G

- **Product Line Evolution**

1. Systems Engineering provide inputs on roadmap milestones and options (G)
2. Systems Engineering provides advice regarding direction to be given to contractors concerning level of detail and incorporation of changes to all contractors regarding incorporation of new technology (G)

- **Contract Funding**

1. Provide contracts management (G) (See contract)

- **Program Funding**

1. Obtain/retain program funding (G)

- **Risk Management**

1. Manage risks in accordance with existing JMPS documented Risk Management Process (G)
2. Ensure compliance for risk process (G)

## Government Program Mgmt

- Future Requirements Management
- Program Planning
- Controlling the Technical Effort
- **Product Line Evolution Management**
- **Contract Management**

- Controlling the Technical Effort
- Product Line Evolution Management
- Contract Management
- Program Funding
- Risk Management
- **System Architectural Considerations**
- **Organizational development**

## Typical Products

Risk Management Process  
Requirements Process

- **System Architectural Considerations**

1. Approve use cases/requirements, interfaces, object model, what is contained in the builds. (B)
2. Review performance analysis (B)
3. Ensure JTA/COE compliance standards are met (B)
4. Provide guidance to software developers regarding top level system architecture. (B)
  1. Level of detail for use cases, interface, object model

- **Organizational development**

1. Develop Organization (B)
2. Attend Meetings, design reviews (B)

# Framework Maintainers, CC Developer

**Mission Planning SE**

HW/SW Req. Ana.	Component Test	Component Integration Test
-----------------------	-------------------	----------------------------------

**Key** (SC) SEIT Contractor

(G) Government

(CC) Common Software/framework maintainers  
developers

(B) SC and/or G

## Developer

- **HW/SW Requirements Analysis**
- **HW/SW Design**
- **System Architecture**
- **Design Component**
- **Design Capability**
- Component Test
- Capability Testing
- Risk Management
- Technical Rules, Standards
- Metrics
- Training inputs

## Typical Products

Software Requirements Specification  
Interface Design Documentation  
Programmers Guide  
Component test procedures  
COE compliance Level 6  
Security compliance & Metrics report

## • HW/SW Requirements Analysis

1. Develop Use Cases (CC)
2. Assist in HW, COTS evaluation, if required (CC)
3. Provide inputs for User Manual & Programmer Guide (CC)
4. Provide inputs for Interface development (IDD), and maintain control of I/F (CC)

## • HW/SW Design

## • System Architecture

1. Implement JMPS IPT Approved system level use cases (CC)
2. Develop interfaces, object model, build content and provide for changes (CC)
3. Build/implement Object Model to top level system architecture as defined by the government (CC)
4. Build components - level of componentization as defined from System Architecture (CC)

## • Design Component

# Framework Maintainers, CC Developer

Interface Design Documentation  
Programmers Guide  
Component test procedures  
COE compliance Level 6  
Security compliance & Metrics report

Key (SC) SEIT Contractor

(G) Government

(CC) Common Software/framework maintainer  
developers

(B) SC and/or G

- **Component test**

1. Perform Component qualification test (CC)
2. Develop/Comply with test plan, procedures, and provide results of testing (CC)

- **Capability testing**

1. Review JMPE System test to avoid duplication (CC)
2. Conduct requirements test of component (CC)
3. Conduct certification test (COE, Security) (CC)

- **Risk Management**

1. Manage risks in accordance with existing JMPS documented Risk Management Process (CC)
2. Execute Risk Management (CC)

- **Comply with JMPS Business and Technical Rules, Standards (CC)**

- **Metrics input**

1. Comply with SEIT Metrics plan (CC) (Metrics CDRL)

- **Training**

1. Provide training inputs for instruction/manuals

## SEIT Tasks

### • Integration

- Requirements Analysis
- Architecture and Design Guidance
- System Evolution Management
- Understanding UPC Customer Needs
- CM DM QA Ilities
- Cost, Schedule, Performance, Quality
- Risk Management
- Process Definition and Management
- User Support
- Engineering Management
- Government Program Man. Support
- Developer Support
- Maintain Close Coordination with Warfighters

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metrics reports, Data Model, CM Plan

### • Integration

1. Perform Vertical and horizontal integration of common software (B)
2. Provide integration support for UPC, as required (B)
3. Provide UPC compatibility testing (B)
4. Coordinate between common software developers to ensure compatibility (B)
5. Establish and ensure adherence to design standards (B)
6. Ensure compliance with business and technical rules (B)
7. Provide integration support for User Developed Apps (B)
8. Ensure development of and maintain C4ISP architecture data views, in accordance with C4ISP Framework (B)
9. System Verification and Validation

1. Support Government DT/OT for

## SEIT Tasks

### • **Integration**

### • **Requirements Analysis**

- Architecture and Design Guidance
- System Evolution Management
- Understanding UPC Customer Needs
- CM DM QA Ilities
- Cost, Schedule, Performance, Quality
- Risk Management
- Process Definition and Management
- User Support
- Engineering Management
- Government Program Man. Support
- Developer Support
- Maintain Close Coordination with Warfighters

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metrics reports, Data Model, CM Plan

### • **Integration (continued)**

10. Perform Security certification/Accreditation (B)
11. Provide Public Interface control (B)
12. Integrate and test JMPS Framework and common software (B)
13. Integration of additional flight planning software per government request. (B)
14. Assist other developers in asynchronous testing (B)
15. Support compatibility testing among UPCs (B)

### • **Requirements Analysis**

1. Manage and review JMPE System requirements (B)
2. Develop JMPE System requirements, ie. ISRT inter-service requirements team (G)
3. Manage high-level Use Case data base and traceability to system requirements and system tests (B)
4. Manage operational Use Case data base and

# SEIT Tasks

Systems Requirements Analysis	Req. and Design Compliance	Integration Test	System Test	Operational Test Assist	Warfighter Use Assist User Support
-------------------------------	----------------------------	------------------	-------------	-------------------------	------------------------------------

Key (SC) SEIT Contributor

(G) Government

(CC) Common Software/framework maintainer developers

## SEIT Tasks

- Integration
- **Requirements Analysis**
- **Architecture and Design Guidance**
- **System Evolution Management**
- Understanding UPC customer needs
- CM DM QA Ilities
- Cost, Schedule, Performance, Quality
- Risk Management
- Process Definition and Management
- User Support
- Engineering Management
- Government Program Man. Support
- Developer Support
- Maintain Close Coordination with Warfighters

## • Requirements Analysis (continued)

1. Support the software developers regarding compliance with the top level system architecture. (B)
  1. Level of detail for use cases, interface, object model (B)
2. Ensure all interface/requirements disconnects are resolved (B)

## • Architecture and Design Guidance

1. Ensure system to systems compliance (I.e C4ISP)(B)
2. Develop/maintain top level architecture, identify Interdependencies between CC and Framework components, and data modeling (B)
3. Provide design guidance in accordance with operational, system and technical architectures

## • System Evolution Management

1. Build roadmap with milestones (B)

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metric reports, Data Model, CM Plan

# SEIT Tasks

Systems Requirements Analysis	Req. and Design Compliance	Integration Test	System Test	Operational Test Assist	Warfighter Use ASSIST User Support
-------------------------------	----------------------------	------------------	-------------	-------------------------	------------------------------------

Key (SC) SEIT Contractor

(G) Government

(CC) Common Software/framework maintainers developers

(B) SC and/or G

## SEIT Tasks

- Integration
- Requirements Analysis
- Architecture and Design Guidance
- **System Evolution Management**
- **Understanding UPC customer needs**
- CM DM QA Ilities
- Cost, Schedule, Performance, Quality
- Risk Management
- Process Definition and Management
- User Support
- Engineering Management
- Government Program Man. Support
- Developer Support
- Maintain Close Coordination with Warfighters

## System Evolution Management

1. Manage COTS, Software, Hardware
  - a. Evaluate COTS , Software and Hardware upgrades and provide recommendations, anticipate evaluation once a year (B)
  - b. Purchase upgrade (G)
  - c. Recommend COTS product integration into next maintenance release (B)
  - d. Provide COTS, Hardware, and Software upgrades, if required (B)
  - e. Manage licenses, if required (B)

## Understanding UPC Customer needs

1. Attend design reviews, TIMs, UPC events, working groups (I.e COE) etc., per govt request (B)
  1. ~63 (AF/Navy/Army) UPCs (potential for fewer meetings, since a contractor may build more than one UPC) over 7-10 yrs
  2. ~40 Common Capabilities (many components may be reviewed at once since there is only a few contractors developing the CC software).

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metric reports, Data Model, CM Plan

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metric reports, Data Model, CM Plan

## • Understanding UPC Customer needs

1. Participate in Working Group Support (I.e developer, COE, etc..) (B)

## CM DM QA illities

1. Maintain comprehensive knowledge repository (B)
2. Manage Master Software Configuration, (source code, docs, etc..) including management of multiple baselines, captured in CM Plan (B)
3. Provide Hardware System configuration management (as installed) (G)
4. Control, distribute and archive all versions (framework, Common Components and service specified tasks for UPCs) (G-Navy, B-AF, Army )
5. Build and test integration test scripts (B)
6. Build and test developer install scripts (SC)
7. Maintain integrated programmers guide, Interface Control Documents, certifications

- **User Support**
- Engineering Management
- Government Program Man. Support
- Developer Support
- Maintain Close Coordination with Warfighters

## Typical Products

Top-level Architecture, Integrated Master

Schedule, Metric reports, Data Model, CM Plan

## • User support

1. Provide Hot Line, Help Desk, Web site for users (G)
2. Manage operational releases, including tech data (G)
3. Build releasable configurations for field (G)
4. Provide release notifications to the field (G)
5. Distribute releases (Web, CD) for field operations (G)
6. Assist in network installations for field operations (G)
7. Integrate GFI and UPC training modules (G)
8. Publish and distribute training material (Web, CD) (G)
9. Provide online learning courses (G)
10. Develop integrated users manual (G)
11. Provide onsite support to users (G)
12. Provide JMPE Support to Sustainment team (SC)
